

Help support young competitive cyclists in Cuba

www.bikesforcuba.com

You can help by making equipment donations or by helping transport donated equipment during your next Cuban holiday.

Complete details of the program including what donations are needed and how transporting donated bikes is done is available on the website and on the reverse side>>>

Bikes For Cuba.....How can you help?

Bikes for Cuba is a small personally run project supporting the junior school cycling program in Banes Cuba near Holguin and Guardalavaca.

They need decent road style bicycles and related equipment including tires, helmets, cycling jerseys, cycling shoes, parts, tools....almost anything suitable for road riding. Bikes should have size 700 wheels and tires as getting parts there for replacements is impossible and we have to keep some uniformity amongst the bikes. Tubular wheels are okay too. Smaller bikes and frames are particularly needed.

Transporting the donated bikes to Cuba is done with volunteers. Tourists going on vacation to Cuba can easily take bikes with them on the airplane. Bikes are boxed for transport and the airlines take these bikes regularly as basic sporting goods. We look after all costs if any. Upon arrival in Cuba the bikes are simply loaded onto the resort bus along with regular luggage. The team coach in Cuba then arranges a convenient time to pick up the bikes at the resort.

We have donated bikes and equipment ready to go at all times, year round.
